Brand New Book ***** Print on Demand *****.Excerpt from Electrical Engineering Problems, Vol. 1: Part I Direct Current Circuits and Apparatus, Part II Alternating Current Circuits and Apparatus This little book of problems is offered as a system of exercises suitable for use with any of the available textbooks or with a lecture course. Most of the problems have been used in the classes of the author. A novel feature is the stating of the time needed to perform the actual solving of each problem. This should prove useful not only to the instructor in the assignment of problems, but also to the student as a measure of his own speed. In most of the problems the time given is that which was actually used by an undergraduate student. It will, however, probably be found necessary to allow more time to the average class than is here indicated. Sheets giving the answers to the problems will be provided in such quantities as may be needed, but only to instructors.
